"This piece, one of the most ambitious projects ever undertaken by the artists of the City of Porcelain, marks a milestone in the work of Lladró. In a display of artistic and technical virtuosity, even the tiniest detail imagined by Perrault has been recreated: the horses reins are gold-plated while the harnesses are embellished with zircon and the inside of the carriage is profusely decorated. Luxury, magic and dreams all come together in a creation which, measuring 116 cm long, is one of the biggest Lladró pieces yet undertaken." – Lladró website
